

SUMMARY

Linguistic experiments I conducted led me to understand how analysis, repeated observation, examination, and elaboration of theories will clarify and sharpen understanding of form, meaning, and context of data. I extracted structured narratives and insights of rare speech and sound structures from scattered data by organizing linguistic taxonomy of metadata I collected and classified. I hold myself to this approach, concerning myself with focus on detail but keeping the larger frame in mind, and I am keen to work, share, and advance with others who share a similar philosophy.

EXPERIENCE

Husch Blackwell

Chicago, IL, USA
2016 - 2017

Billing Specialist

- Provided financial analysis, reports, and client account data by utilizing accounting applications.
- Initiated and implemented all aspects of accounting and client billing for legal services.
- Maintained communication with attorneys, staff, and clients while observing confidentiality.
